

FOR IMMEDIATE RELEASE

Vicor Receives Prestigious Lockheed Martin STAR Supplier Award

Andover, MA, August 21, 2007...Vicor Corporation (NASDAQ: VICR) was recently notified that it has received a coveted supplier award. On July 10, Lockheed Martin's Simulation, Training & Support presented Vicor with the STAR supplier award, recognizing excellence in quality and delivery performance. The STAR program measures supplier performance data over a 12-month rolling period. Any Lockheed business area can nominate a supplier; however, all other Lockheed business areas have the opportunity to approve or reject the nomination. Needless to say, these are challenging criteria and very few suppliers ever achieve this award.

Lockheed Martin, with nearly \$40 billion in annual sales, is a premier systems integrator principally engaged in the research, design, development, manufacture, integration, and sustainment of advanced technology systems, products, and services. The core markets of the company are defense and intelligence, homeland security, and systems and information technology. The company, with more than 3,000 programs in the United States and worldwide, typically accounts for about 19 percent of global defense exports and about 40 percent of all U.S. defense exports.

"We are gratified to receive such a prestigious award," said Keith Nardone, Sr. Manager – Defense Products, "but such awards don't just happen. They take creative, responsible people at every level of Vicor working hard every day to meet the high expectations of our world-class customers."

About Vicor Corporation

Vicor offers tens of thousands of standard and custom high-performance power conversion components delivered worldwide with very short development cycles. The Vicor PowerBench on-line tool suite enables the design of customized brick or configurable power supplies to their exact specifications in minutes. The company's modular power conversion components are used in the communications, data processing, industrial control, test equipment, medical, and defense electronics markets. Vicor's innovation, leadership, speed of delivery, and breadth and depth of its product lines make it a top supplier to civilian and military manufacturers across the globe.
