

For Immediate Release:

Flexible, Powerful, On-line Configuration Tool for Westcor AC-DC Power Supplies

Andover, MA, June 28, 2005...Vicor Corporation (NASDAQ: VICR) announced the release of a flexible, powerful, on-line configuration tool for its Westcor Division's AC-DC power supply product line.

VSPOC™ (Vicor Systems Product Online Configurator) is a proprietary online system that enables a registered user to specify and verify complete power solutions in real time. The system is fully integrated with Westcor manufacturing operations. Once the user approves the product configuration, a bill of materials is generated and an order can be placed immediately.

By using Vicor's wide range of DC-DC converter modules as a base, Westcor is able to offer a broad range of power factor corrected AC-DC supplies with complete user configurability and high efficiency.

"Today's design engineer is driven by ever-shortening design cycles and rapid time-to-market requirements", said Jeff Lally, Sr. Product Marketing Manager. "This is definitely a site that power designers will appreciate because it gives them the power solutions they need when they need them."

The benefits of this new configuration tool — VSPOC — along with Vicor's Prototype Express ordering program, are designed to make product selection of AC-DC power solutions simpler and faster for power designers. A new feature called *My Designs*™ allows users to save all of their designs generated from Vicor's design and configuring tools – VDAC™, VCAD™ and VSPOC – and easily access them for future review and editing.

VSPOC, along with the rest of Vicor's comprehensive power conversion design tools, is readily accessible at www.vicorpower.com.

Prototype quantities of new designs are typically delivered in less than six weeks. Unit pricing will depend on the user's specific requirements and power level. For data sheets and additional information on Vicor AC-DC power products, please visit the Vicor website at www.vicorpower.com. To order, contact Vicor Express at 800-735-6200 or e-mail vicorexpress@vicr.com.

This press release contains certain forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. You can identify these statements by our use of the words “may,” “will,” “would,” “should,” “plans,” “expects,” “anticipates,” “believes,” “is designed to,” “continue,” “estimate,” “project,” “intend,” and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. These risks and uncertainties include our ability to develop new products cost-effectively and our ability to decrease manufacturing costs, as well as those risks and uncertainties identified in the Company’s Annual Report on Form 10-K. The risk factors contained in the Annual Report on Form 10-K may not be exhaustive. Therefore, the information contained in that Form 10-K should be read together with other reports and documents that the Company files with the SEC from time to time, which may supplement, modify, supersede or update those risk factors.
