

Industry: Industrial
Application: "People Mover" Audio System
Summary: This compact DC input, single output supply powers an audio system directly from a 12V automotive battery. The converter module is socketed on the opposite side of the PCB to allow mounting directly to the vehicle chassis for improved thermal performance.

Specifications

Input: 12 Vdc
Output: +24 Vdc
Total Power: 100 Watts
Dimensions: 1.4"H x 3.0"W x 2.5"L
Weight: 0.3 lb.
Type of Cooling: Conduction

M-4008: Automotive Input Power Module
